

# Health Information Technology Program

Technology is everywhere you look in a healthcare facility, from electronically checking in patients and updating their medical records to sending them the blood draw results in their online chart. If you are interested in keeping all those systems running in this in-demand, behind-the-scenes field, then the Health Information Technology program of study is for you.

## What can I do with a health IT background?

This pathway is a fusion of health and IT fields that you can take into a variety of settings such as hospitals, clinics, and insurance companies. You will learn how to manage health records databases, navigate complex insurance systems and communicate with patients.

## Is health IT a good career?

Experts predict Health IT will be one of the fastest growing career fields in DC over the next 5 years. This career path includes remote work options and a high pay rate.

## What CTE courses will I take at the ATC?

- Principles of Health Science
- Medical Terminology
- Anatomy and Physiology
- Medical Billing & Coding

## Which courses do I earn dual credit?

Students can earn dual credit through Trinity Washington University for every ATC course.

## Is there an internship?

Yes, you can participate in an internship during the summer.

## How can this pathway advance my career?

Most health IT careers require some additional postsecondary training from a certification to an associate degree. At the ATC, you will earn credentials *and* early college credit giving you a jumpstart on your future

## How much can I make?

\$63,200\* per year /  
\$30.32 per hour  
*\*For Washington, DC metro area*

## How do I get started?

The deadline to enroll for School Year 2022-23 **closes on May 20**. Students who will be in 9<sup>th</sup>-11<sup>th</sup> grades next year are eligible to enroll.
