The AWS D1.1 Structural Steel Welding Code provides specifications and requirements for welding procedures.

A student can earn a welder performance qualification by demonstrating the ability to produce welds meeting the prescribed standards in accordance to AWS D1.1 Structural Steel welding code.

If a student obtains the qualification, the document certifies that the student is qualified to produce specific welds in accordance with D1.1.

There are various certifying entities that offer this certification. When selecting a qualification provider, districts should choose certifying entities who are best aligned with their regional employment needs.

Prerequisite Preparatory Course(s)

- Welding I, II
- Practicum in Manufacturing
